## **History**

The Ulster & Delaware rail ride crossed the Catskills from Kingston Point on the Hudson, to Oneonta in the Susquehanna Valley. Chartered in 1866 as the Rondout & Oswego, and reorganized in 1872 as the New York, Kingston & Syracuse, it became the Ulster & Delaware in 1875, and was completed to Oneonta in 1900. There was also a branch - originally the narrow-gauge Stony Clove & Catskill Mountain - from Phoenicia, through Stony Clove Notch, to Hunter, and a connecting narrow-gauge extension, the Kaaterskill rail ride, from near Hunter to the Mountain Top destinations of Tannersville, Haines Falls, Kaaterskill Falls, and Catskill Mountain House.

Surmounting dramatic mountain scenery with four percent grades that demanded three Ten-Wheelers for an eight-car passenger train, the Ulster & Delaware was often called the most scenic line in the east. It helped create and then profited handsomely from a boom in the Catskill tourist trade, while providing outlets for the area's agricultural, timber, bluestone, and other products. It also provided a through, if roundabout, route for coal bound from northeastern Pennsylvania mines to New York City - indeed, one of the reasons it was built, was to bring Delaware & Hudson coal from Oneonta to the Hudson River steamboats of Thomas Cornell, one of the U&D's chief promoters.
