

If you're looking for the Big Mountain experience, look no further. Hunter Mountain is only two hours north of Metropolitan New York in the beautiful northern Catskill Mountains, and boasts trails to impress and accommodate every skier and snowboarder. Whether you are a first timer or a seasoned pro, the Hunter Mountain experience is a match for your skills.

With three mountains, Hunter offers many of the traditional snow sports associated with mountain resorts. We've broadened the possibilities for snow adventure and excitement by offering snowshoeing, snowtubing, and a half-pipe in our Terrain Park, allowing skiers, snowboarders and visitors of any skill level to relish our great outdoors.

There's a vertical drop of 1,600 feet and you'll ski or ride over 230 acres on 53 trails with more variety than you can handle in a day or two or more. The lifts are fast, with a carrying capacity of nearly 17,000 skiers per hour. With Hunter One, Hunter Mountain and Hunter West, there's triple the fun. Our beginner's area, Hunter One, has 5 lifts and tows serving 16 trails for beginners and novices, as well as some "more difficult" terrain for the intermediate skier or rider.

Commitment is the word that best describes the attitude toward snowmaking at Hunter Mountain. Long ago, the nickname, "The Snowmaking Capitol of the World" was applied and there will never be a more adequate moniker. Whenever the weather dips to the freezing point, Hunter's arsenal begins to rage. And, it doesn't stop until the temperature rises again.

Hunter Mountain is located directly across from our house at Scribner Hollow. Views of the slopes are outstanding from the Living room as well as our upstairs master bedroom. Wake up to skiers swishing down the slopes and go to sleep watching the stars high above the mountain. The views here just can't be beat.
